THE GRAND
1000 GRAND AVENUE

Long-lasting door hardware accessories designed with our customers in mind

Ives provides customers with an expansive range of door hardware accessories to complete the opening and exceed application needs. Whether your goal is to hang the door, operate the door or protect the door, trust Ives to make it happen. Our product line includes a wide variety of hinges, pivots, door pulls, protection plates, door stops and much more. Don't let the breadth of our offering fool you. We're invested in quality, which means each product is built to last. That investment extends to our customer support. Our focus and investment in the quality and reliability of our long-lasting solutions extends to our relationships and service. We are committed to listening to our customer's needs and taking action.

Product enhancements, delivery improvements, customer support materials—you name it. As a trusted brand since 1876, Ives perseveres as an industry leader today with an authentic and pioneering spirit, founded in quality and customer service.

Ives quick ship offering

Ives offers select products in Allegion ProExpress and FastTrack programs. ProExpress provides customers with an option for mid-price point solutions that gives the convenience of placing a single order that ships next business day. The FastTrack program includes a select offering of premium products that will ship in 5 days, allowing customers to receive the product(s) fast. Choose from our broad list of hinges, pivots, door pulls, protection plates, door stops and much more.

View the ProExpress and FastTrack price books for the full offering.

Door handing

Architectural hinges

Ives offers a variety of architectural hinges, also known as butt hinges, that will cover any need in residential and commercial applications while also exceeding code requirements. Choose from high-quality hinges offered in a variety of substrates, knuckles, bearings, and styles. Use our selection guide in the general information section to better understand the right hinge for your application.

General information

Selection of the proper weight and bearing type

Standard weight	Plain bearing
Standard weight	Ball bearing, concealed bearing
Heavy weight	Ball bearing, concealed bearing

Considerations to determine weight and bearing type

- Weight of door
- Frequency of use
- Frame
- Door hardware

Always use ball bearing or concealed bearing hinges for doors with door closers and in all fire rated openings. Doors over 150 pounds and/or used more than 100 times per day should be hung on heavy weight ball bearing or concealed bearing hinges.

Guidelines for hinge metal

- Interior door or non-corrosive area use: plated or painted steel
- Interior labeled door use: plated or painted steel, stainless steel
- Interior door in corrosive area use: stainless steel, brass, bronze
- Exterior doors use: Stainless steel, brass, bronze

Standard pin material are brass hinge – steel pin, Stainless steel hinge – stainless steel pin, steel hinge – steel pin

Guidelines for frequency of door usage

Build type	Daily usage	Hinge type
High frequency/heavy weight door		
Large department store entrance	5,000	Heavy weight
Hospital corridor and surgical doors	5,000	Heavy weight
Large office building entrance	4,000	Heavy weight
School entrance	1,250	Heavy weight
School toilet door	1,250	Heavy weight
Office stairwell	500	Heavy weight
Office building toilet door	400	Heavy weight
Medium frequency/medium weight door		
School corridor door	100	Standard weight
Hospital consultation rooms	100	Standard weight
Office building corridor door	80	Standard weight
Store toilet door	60	Standard weight
Storage room	50	Standard weight
Low frequency/light door		
Residential entrance	30	Plain bearing
Interior residential	20	Plain bearing

ANSI/BHMA Grade/minimum cycle requirements

- Grade 1: 2,500,000 Heavy weight ball and concealed bearing
- Grade 2: 1,500,000 Standard weight ball and concealed bearing
- Grade 3: 350,000 Lightweight plain bearing

Considerations to determine hinge size

- Door width
- Door thickness
- Weight
- Clearance

Guidelines for hinge height

Door thickness In inches	Door width In inches	Hinge height In inches
1 3/8"	Up to 32"	3 1/2"
1 3/8"	32" to 37"	4"
1 3/4"	Up to 36"	4 1/2"
1 3/4"	36" to 48"	5"
1 3/4"	Over 48"	6"
2" - 2 1/2"	Up to 42"	5" heavy weight
2" - 2 1/2"	Over 42"	6" heavy weight

Clearance requirement*

Door thickness	Clearance needed	Hinge open width
1 3/8"	1 3/4"	4"
1 3/4"	1"	4"
1 3/4"	1 1/2"	4 1/2"
1 3/4"	2"	5"
1 3/4"	3"	6"
2"	1"	4 1/2"
2"	1 1/2"	5"
2"	2 1/2"	6"
2 1/4"	1"	5"
2 1/4"	2"	6"
2 1/2"	1/2"	5"
2 1/2"	1 1/2"	6"
3"	3/4"	6"
3"	2 3/4"	8"

*Distance needed between wall and door at 180° to allow for any projections from wall; trim, decorative molding, etc. Consult factory technical service for engineered special applications

Guidelines for number of hinges

- Doors under 7'6" - 3 hinges
- Doors over 7'6" - 4 hinges

Location of hinges

General information

Electrification options

Electrical through-wire (TW4, TW8 and TW12)

Provides electric power transfer from the frame to the door in order to supply power to an electrified mortise or cylindrical locks, exit devices with electric latch retraction, and/or electric strikes (pairs of doors). Each wire is 28 AWG and rated 50 volts AC/DC at 3.5 amp continuous and 16 amp pulse. Maximum pulse 400 milliseconds. Ives through-wire hinges are available with 4 wire (TW4), 8 wire (TW8) installations and 12 wire (TW12) installations. All TW4, TW8 and TW12 architectural hinges are standard with the Allegion Connect 8-pin Connector which makes it easy to connect to other electrical consumption devices.

- UL634 Listed
- Not available 3PB1
- Not available with security stud (SH) option
- Packaged one hinge per box with standard wood and machine screws
- Hinge is NRP as a standard
- High quality brass ferrules and plastic tubing protect the wires
- Through-wire hinges cycle tested to industry standards
- Special wire gauge, number, and color configurations available, contact factory

Electrical Monitor (MON, TW4M, TW8M)

Provides door position monitoring. Monitor is rated 30 volts AC/DC at 0.25 amp. Fully compatible with through-wire hinges with 4 wire (TW4M) and 8 wire (TW8M) options. Supplied standard with CON, Allegion's modular 8-pin connector for connection to other electrified products.

- UL634 Listed
- Not available 3PB1, 3SP1, and 5PB1 models
- Not available on 3.5 x 3.5 and 4X4 size hinges
- Not available with security stud (SH) option
- Packaged one hinge per box with standard wood and machine screws
- Hinge is NRP as a standard
- High quality brass ferrules and plastic tubing protect the wires
- Through-wire hinges cycle tested to industry standards
- Special wire gauge, number, and color configurations available, contact factory

How to order

Number of knuckles	Function	Type	Weight/type	Options	Height x Width	Finish	Options 2							
1	2	3	4	5	6	7	8							
5	-	BB	-	1	-	HW	-	SH	-	4.5x4.5	-	652	-	NRP

Detail

1	Number of knuckles
3	3 Knuckle
5	5 Knuckle

2	Function
PB	Plain bearing
BB	Ball bearing
CB	Concealed bearing
SP	Spring hinge

3	Type
1	Full mortise
2*	Half mortise
3*	Full surface
4*	Half surface

*Engineering special. Consult factory for specific lead time.

4	Weight/type
Blank	Standard weight (BHMA Grade 2)
HW	Heavy weight (BHMA Grade 1)
SC	Swing clear
BSC	Beveled swing clear
SCHW	Swing clear, heavy weight
BSCHW	Beveled swing clear, heavy weight
WT	Wide throw

5	Options
HT	Hospital tip
SH	Security stud (includes NRP as standard offering) on hospital tip and on the TW and MON.

6	Height x Width
3.5	x 3.5
4	x 4
4.5	x 4, 4.5, 5, 6
5	x 4.5, 5, 6, 7, 8

Consult model page for availability.

7	Finish		
BHMA	Description	Substrate	Finish
600	Primer Paint	Brass	USP
605	Bright Brass	Brass	US3
606	Satin Brass	Brass	US4
612	Satin Bronze	Brass	US10
613	Oil Rubbed Bronze	Brass	US10B
614	Oxidized Bronze	Brass	US10A
619	Satin Nickel	Brass	US15
622	Matte Black	Brass	B-BLK
625	Bright Chrome	Brass	US26
626	Satin Chrome	Brass	US26D
643e	Aged Bronze	Brass	B-643E
695	Dark Bronze Painted	Brass	B-695/US10BE

7	Finish		
BHMA	Description	Substrate	Finish
629	Bright Stainless	Stainless steel	US32
630	Satin Stainless	Stainless steel	US32D
631	Matte Black	Steel	F-BLK
632	Bright Brass	Steel	US3
633	Satin Brass	Steel	US4
639	Satin Bronze	Steel	US10
640	Oil Rubbed Bronze	Steel	US10B
641	Oxidized Bronze	Steel	US10A
643e/716	Aged Bronze	Steel	F-643E/716
646	Satin Nickel	Steel	US15
651	Bright Chrome	Steel	US26
652	Satin Chrome	Steel	US26D
695	Dark Bronze Painted	Steel	F-695/US10BE

8	Options 2
MON*	Monitor
NRP	Non-removable pin
RC-1/4	Rounded corners 1/4"
RC-5/8	Rounded corners 5/8"
SEC	Security screws (hollow metal - hex head pin in socket) (metal only)
TW4	Through-wire - four wire
TW8	Through-wire - eight wire
TW12	Through-wire - twelve wire
TW4M*	Through-wire - four wire with monitor
TW8M*	Through-wire - eight wire with monitor

* TW and MON options are not available on 4 x 4 or smaller.

Hinges and pivots

Architectural hinges

3PB1

3 Knuckle, plain bearing full mortise hinge

- Recommended for standard weight doors
- Recommended for low frequency usage
- Not recommended for use with a door closer
- Packed with fasteners for hollow metal and wood doors
 - 12-24 x 1/2 UFPHMS, 12 x 1 1/4 FPHWS
 - 10-24 x 1/2 UFPHMS, 10 x 1 FPHWS (3.5x3.5 hinge size only)

Specifications

Material substrate	Made from brass, 1040 steel or 304 series stainless steel
Certifications	<ul style="list-style-type: none"> ▪ Certified ANSI/BHMA A156.1 for performance standards ▪ Meets ANSI/BHMA 156.7 for template hinge dimensions

Dimensions

Height x width	Size (mm)	Gauge
3.5 x 3.5	89 x 89	0.123
4 x 4	102 x 102	0.130
4.5 x 4	114 x 102	0.134
4.5 x 4.5	114 x 114	0.134
5 x 4.5	127 x 114	0.146

Refer to General Hinge Information page to determine proper hinge for application

Options

NRP	Non-removable pin
HT	Hospital tip
SH	Security stud - comes standard with NRP
RC-1/4, RC-5/8	Rounded corners
SEC	Security fasteners - pin-in-socket (for hollow metal doors and frames only)

Finishes

BHMA	Description	Substrate	Finish

For other colors, consult factory.

3CBI

3 Knuckle, concealed bearing full mortise hinge

- Recommended for medium weight doors (<150 lbs)
- Recommended for medium frequency usage (<400 cycles per day)
- Made with two concealed nylon bearings
- Recommended for use with a door closer
- Packed with fasteners for hollow metal and wood doors
 - 12-24 x 1/2 UFPHMS, 12 x 1 1/4 FPHWS
 - 10-24 x 1/2 UFPHMS, 10 x 1 FPHWS (3.5x3.5 hinge size only)

Specifications

Material substrate	Made from brass, 1040 steel or 304 series stainless steel
Certifications	<ul style="list-style-type: none"> ▪ Certified ANSI/BHMA A156.1 for performance standards ▪ Meets ANSI/BHMA 156.7 for template hinge dimensions ▪ UL Classified for windstorm rated assemblies - R37965 ▪ UL 10C Listed for steel only (3 hour)

Dimensions

Height x width	Size (mm)	Gauge
3.5 x 3.5	89 x 89	0.123
4 x 4	102 x 102	0.130
4.5 x 4	114 x 102	0.134
4.5 x 4.5	114 x 114	0.134
5 x 4.5	127 x 114	0.146
5 x 5	127 x 127	0.146

Refer to General Hinge Information page to determine proper hinge for application

Options

NRP	Non-removable pin	TW4	Four wire
HT	Hospital tip	TW4M*	Four wire with monitor
SH	Security stud - comes standard with NRP	TW8	Eight wire
RC^{-1/4}, RC^{-5/8}	Rounded corners	TW8M*	Eight wire with monitor
SEC	Security fasteners - pin-in-socket (for hollow metal doors and frames only)	TW12	Twelve wire
		MON*	Monitor

*TW and MON options are not available on 4 x 4 or smaller.

Hinges and pivots

Architectural hinges

5BB1

5 Knuckle, ball bearing full mortise hinge

- Recommended for medium weight doors (<150 lbs)
- Recommended for medium frequency usage (<400 cycles per day)
- Made with two ball bearing assemblies
- Recommended for use with a door closer
- Packed with fasteners for hollow metal and wood doors
 - 12-24 x 1/2 UFPHMS, 12 x 1 1/4 FPHWS
 - 10-24 x 1/2 UFPHMS, 10 x 1 FPHWS (3.5x3.5 hinge size only)

Specifications

Material substrate	Made from brass, 1040 steel or 304 series stainless steel
Certifications	<ul style="list-style-type: none"> ▪ Certified to ANSI/BHMA A156.1 for performance standards ▪ Meets ANSI/BHMA 156.7 for template hinge dimensions ▪ UL Classified for windstorm rated assemblies - R37965 ▪ UL10C Listed for steel only (3 hour)

Dimensions

Height x Width	Size (mm)	Gauge
3.5 x 3.5	89 x 89	0.123

1000 Series

Residential hinges

- 3.5 x 3.5 or 4 x 4 plain bearing hinges
- Recommended for doors weighing less than 70 lbs and not exceeding 3'0" x 7'0"
- Recommended for low frequency, residential applications
- Features removable pin and cap
- Now compatible with Ives hinge pin door stops, models 69, 70, 72, 73
- Not recommended for use with a door closer
- For metal door applications see 3PB1 and 5PB1 models
- Available with rounded ($\frac{1}{4}$ " or $\frac{5}{8}$ ") or square corners
- Packed with fasteners for wood doors
 - #9 x 1 FPHWS

Hinges and pivots**Aluminum geared continuous hinges**

Aluminum geared continuous hinges

Geared continuous hinges are designed to last the life of a building by distributing the weight of a door along the entire length of its frame. The geared continuous hinge has no pin. Instead, these hinges utilize a single gear section for the leaf and a separate gear section for the frame side of the door. The two are held in place by a full-length cover channel and rotate on a series of bearings. Ives HD models feature a spread bearing design for lighter weight doors. The XY models feature lateral and vertical adjustment after the hinge is secured to door and frame, a center loaded bearing design to help reduce frame issues and has electric through-wire panel option with a continuous cover.

Hinges and pivots

Aluminum geared continuous hinges

General information

ANSI/BHMA Certified

All Ives aluminum geared hinges are certified to ANSI/BHMA 156.26, Grade 1

XY models: Grade 1 150lb and 300lb door test

HD models: Grade 1 150lb door test

UL Listed

All Ives Aluminum geared hinges are tested and approved UL 10C (90 minutes).

Material

6063-T6 Aluminum.

Hinge duty

All Ives Aluminum geared hinges are heavy duty (XY and HD models).

XY model -
slot adjustability

XY model - bearings

HD model

XY models

- Rounded gear design for extended life and smoother operation
- Patented, center loaded, interlocking bearing design which helps handle the opening and closing of the door better over time (all sizes have 37 bearings)
- XY mounting slot adjustability on all full and half surface models to help with installation
- Frame guidance lip is extended further for retrofit applications to cover existing heavy weight architectural hinge preps
- Improved aesthetics with a curved, articulating cover design which eliminates pinch points

HD models

Features transmission gear design with bearings that are evenly spaced every 3" on center - Amount of bearings varies by size

- 83" - 32 Bearings
- 85" - 32 Bearings
- 95" - 36 Bearings
- 120" - 47 Bearings

Standard lengths

83", 85", 95", 119" (XY models), 120" (HD models)
custom lengths available up to 119", consult factory.
Handing required for 224HD.

Finishes

BHMA	US	Description	Base material
628	US28	Clear Aluminum Anodized	Aluminum
710	313AN	Dark Bronze Anodized	Aluminum
711	315AN	Black Anodized (XY only)	Aluminum

Custom finishes available, consult factory.

Field modifications

Ives aluminum geared continuous hinges can be cut to length from both ends during installation.

XY models

The unique mounting pattern of the XY hinge allows it to be cut down to 69" while still having double row fasteners regardless of the original length of the hinge. Requires the hinge to be cut from both ends. Example: A 119" hinge can have 25" removed from each end to make it a 69" long hinge.

HD models

The unique mounting pattern allows to cut up to 6" from bottom while still having double row fasteners. If cut more than 13.5", other modifications may be necessary.

Door weight

For doors up to 200 lbs, no door reinforcement is required. For doors between 200 and 450 lbs a 16 gauge channel in the frame is required. For doors up to 600 lb, rivet nuts are required in the frame in addition to the frame reinforcement. Max door width of 4'0". For specific door weight reinforcement requirements per model, view the installation instructions and individual product pages for detail.

Lifetime warranty

Ives continuous hinges carry a limited lifetime warranty with exception of electrified continuous hinges, which carry a 12 month warranty from time of shipment.

Learn more at us.allegion.com/warranty.

Hinges and pivots

Aluminum geared continuous hinges

General information

EPT 112HD

TWP XY Series

Note: See ordering guide in price book for proper placement.

Electrification options

Electric power transfer (EPT) available on HD and XY models

Electric power transfer provides the most secure and best solution for transferring power from the door frame to the edge of a swinging door. Ives Continuous Hinges provide standard cut outs to fit Von Duprin EPT-2, EPT-10 and PNT-1 devices. Consult factory for other electrical cut out options. Door handing is required.

Electrical through-wire panel with Allegion Connect (TWP CON) (XY models only)

The redesigned XY Through-Wire Panel is heavy duty and easy-to-install. Hinge consists of single piece cover design for improved aesthetics and three sections with a standard bottom length and through-wire panel location. The panel can quickly slip in and out of the hinge for maintenance and replacement. Unlike all of the other manufacturer solutions, the XY through-wire panel maintains a one piece appearance on the cover side of the hinge. The new wire design features a Teflon™ coated wire which greatly improves performance and durability. The new panel also comes standard with the Allegion Connect 8-pin and 4-pin connectors make it easy to connect to other electrical devices. Warrantied for up to 5 years. Door handing is required.

Provides electric power transfer from the frame to the door in order to supply power to an electrified mortise or cylindrical locks, exit devices with electric latch retraction, and/or electric strikes (pairs of doors). Through-wire is rated 50 volts AC/DC at 3.5 amp continuous and 16 amp pulse. Maximum pulse 400 milliseconds. Ives XY TWP hinges are fully compatible with up to 12 wire requirements.

Electrical cutouts

Ives aluminum continuous hinges are available with factory modified cutouts to accommodate most electrical frame to door requirements. Special templates are required.

When ordering indicate the following:

1. Door size.
2. Handing. LH, RH, LHR or RHR.
3. Manufacturer and model number of the electrical product being used. Example: Von Duprin ETPT2.

Because clearances may vary between door and frame manufacturer, and locations can be influenced by the door hardware it is always recommend contacting Ives Customer Technical for specific template information.

In accordance with industry standards, all cutouts are made from top edge of door to center line of cut-out. If top of door to top of cut-out is provided, $4\frac{5}{8}$ " are added to the dimension provided to determine the centerline of the cut-out. This provides an extra $\frac{1}{8}$ " of tolerance to ensure the EPT will fit during installation when varying installation methods are used.

Standard cut out locations for EPTs and TWP options

Standard length	HD	XY	XY
	EPT	EPT	TWP CON
83"	30"	30"	43.5"
85"	32"	32"	45.5"
95"	42"	42"	55.5"
119" (XY)	—	66"	79.5"
120" (HD)	67"	—	—

XY TWP CON is located 39.5 inches from bottom of the hinge. Consult factory for TWP locations on custom length hinges.

Detail

1 Model

026XY	Full mortise - narrow frame leaf, wide door leaf
027XY	Full mortise - wide door leaf
040XY	Full mortise - wide throw
041XY	Full mortise - swing clear
045XY	Half surface - narrow frame leaf, wide door leaf
046XY	Half surface - wide door leaf
053XY	Half surface - narrow frame leaf, narrow door leaf
054XY	Half surface - narrow door leaf
112XY	Full mortise - narrow frame and door leaf
112HD	Full mortise - narrow frame and door leaf
114XY	Full mortise - narrow frame leaf, door edge protector
157XY	Full surface - center pivot
210XY	Full surface - swing clear
224XY	Full mortise - door edge protector
224HD	Full mortise - door edge protector

2 Finish

BHMA	Description	Substrate	Finish
628	Clear Aluminum Anodized	Aluminum	US28
710	Dark Bronze Anodized	Aluminum	313AN
711	Black Anodized	Aluminum	315AN

View product pages for specific finish availability per model. Consult the factory for custom finish availability.

3 Length

83"
85"
95"
119" (XY) / 120" (HD)

Custom lengths available up to 119", consult factory. When specifying length, handing required.

4 Option

EPT	Electric power transfer prep (Only available on 026XY, 027XY, 112HD, 112XY, 114XY, 224HD, 224XY) Handing (LH and RH) required for 026, 027, 114, and 224 models
SECHM	Security fasteners - pin-in-socket
SECWDHM	Security fasteners - pin-in-socket (half wood, half hollow metal)
SECWDWD	Security fasteners - pin-in-socket (wood door and frame)
TEKSWD	Half thread forming, half wood
TF	Thread forming screws - pilot hole required (Only available with 112HD and 224HD)
TFWD	Half thread forming, half wood
TWP CON	Through-wire panel with Allegion Connect standard (Only available on 026XY, 027XY, 112XY, 114XY, 224XY)
WD	Wood door fasteners

Hinges and pivots

Aluminum geared continuous hinges

026XY

Full mortise - narrow frame leaf, wide door leaf

- Wide door leaf for 2" and 2 1/4" doors
- Recommended for gasketing and weatherstripping applications
- Patented center loaded, interlocking bearing design
- Non-handed for custom cut lengths
- 3/32" door inset
- 48" Maximum door width
- Beveled or square edge doors
- Frame guidance lip is extended further for retrofit applications to cover existing heavy weight architectural hinge preps.
- For doors weighing up to 450 pounds without reinforcing, 600 pounds with reinforcing

Specifications

Standard length	83", 85", 95", 119"
Standard mounting hardware	12-24 x 3/4" Steel self drilling/self tapping Phillips-head screw
Certifications	<ul style="list-style-type: none"> ▪ Exceeds Grade 1 ANSI/BHMA 156.26 for 150lbs and 300lbs ▪ UL10C listed (90 min)

Options

EPT	Electric power transfer
TWP CON	Electrical through-wire panel with Allegion Connect

Optional mounting hardware

SECHM	Security screws - hollow metal door and frame
SECWDHM	Security screws - 1/2 wood, 1/2 hollow metal
SECWDWD	Security screws - wood door and frame
TEKWD	1/2 Self drill, self tap 1/2 wood
WD	Wood door and frame

Finishes

BHMA	Description	Substrate	Finish
628	Clear Aluminum Anodized	Aluminum	US28
710	Dark Bronze Anodized	Aluminum	313AN
711	Black Anodized	Aluminum	315AN

Custom anodizing and painting are available, consult factory.

For single door applications:

For pairs of doors see chart and general information.

Hinges and pivots

Aluminum geared continuous hinges

027XY

Full mortise - wide door leaf

- Wide door leaf for 2" and 2 1/4" doors
- Recommended for gasketing and weatherstripping applications
- Patented center loaded, interlocking bearing design
- Non-handed for custom cut lengths
- Flush mounted, no inset
- 48" Maximum door width
- Beveled or square edge doors
- Frame guidance lip is extended further for retrofit applications to cover existing heavy weight architectural hinge preps
- For doors weighing up to 450 pounds without reinforcing, 600 pounds with reinforcing

Specifications

Standard length	83", 85", 95", 119"
Standard mounting hardware	12-24 x 3/4" Steel self drilling/self tapping Phillips-head screw
Certifications	<ul style="list-style-type: none">▪ Exceeds Grade 1 ANSI/BHMA 156.26 for 150lbs and 300lbs▪ UL10C listed (90 min)

Options

Hinges and pivots

Pin and barrel continuous hinges

Pin and barrel continuous hinges

Pin and barrel continuous hinges share many of the same characteristics of a traditional hinge. Both have a center pin and rolled knuckles. However, a continuous Pin and Barrel hinge stretches along the entire length of the frame. Ives offers both stainless steel and primed steel to best match your specific application. Ives also offers the CS series pin and barrel hinges which provides a patented solution that brings the clean aesthetic design of aluminum geared continuous hinge to the ruggedness and safety afforded by stainless pin and barrel continuous hinges.

Hinges and pivots

Pin and barrel continuous hinges

General information

Certifications

- 700 Series is certified to ANSI/BHMA 156.26, Grade 1
- CS Series models certified ANSI/BHMA 156.26, Grade 1, 150lb door test

UL Listed

- All Ives pin and barrel hinges are certified UL10C listed (3 hr)

Material

- 700, 702, 705, 711, 715 Series 304 Series, 14 Gauge stainless steel
- CS Series 304 Series, 14 Gauge stainless steel body and 6063-T6 aluminum cover

Barrel type

Standard series

The standard series pin and barrel continuous hinges features twin self lubricated nylon bearings with a stainless steel pin.

CS Series

The CS Series is a heavy duty, easy-to-install, stainless steel pin and barrel continuous hinge that can be used for fire applications and is highly suitable for after-market or new construction situations. The patented covers hide the unsightly pin and barrel of the standard pin and barrel hinges, giving the CS Series continuous hinge a stylish appearance to accompany heavy duty performance.

The CS Series includes medical grade, patented nylon winged bearings. They also include the XY adjustability feature which allows for better door alignment during installation.

Standard lengths

- 83", 85", 95", 120"
 - Custom lengths available up to 120", consult factory
 - Handing required for 702, 705, 711, 715

Custom finishes available, consult factory.

Field modifications

Ives pin and barrel continuous hinges can be cut to length during installation.

Standard models

The unique mounting pattern allows to cut up to 6" from bottom while still having double row fasteners. If cut more than 13.5", other modifications may be necessary.

CS models

The CS Series of stainless steel hinges can be cut to size in the field. For aftermarket installations, horizontal slots in the leaves allow for lateral adjustment after the door has been secured to the frame.

Door weight

For doors up to 200 lbs, no door reinforcement is required. For doors between 200 and 300 lbs, a 16 gauge channel in the frame is required. For doors up to 600 lb (max door width of 4'0"), rivet nuts are required in the frame in addition to the frame reinforcement. For door weight reinforcement requirements by model, view the installation instructions and following product pages for detail.

Hospital tips (HT) for standard models

The standard hospital tip option includes an angle machined channel cover and bearing to provide a flush angled surface.

Must be ordered in exact lengths. Available on 700 Series hinges.

Lifetime warranty

Ives continuous hinges carry a limited lifetime warranty with exception of electrified continuous hinges, which carry a 12-month warranty from time of shipment.

Pin and barrel continuous hinges

General information

Electrification options*

Electric power transfer (EPT) available on 700, 705, 715, 700CS, 715CS models

Electric power transfer provides the most secure and best solution for transferring power from the door frame to the edge of a swinging door. Ives pin and barrel hinges provide standard cut outs to fit Von Duprin EPT- 2, EPT-10 and PNT-1 devices. Consult factory for other electrical cut out options. Door handing is required.

Electrical through-wire (TW8) for standard models (700, 705, 715) only

Recommended for low frequency usage. Provides electric power transfer from the frame to the door cable in order to supply power to an electrified mortise or cylindrical locks, exit devices with electric latch retraction, and/or electric strikes (pairs of doors). Through-wire is rated 50 volts AC/DC at 3.5 amp continuous and 16 amp pulse. Maximum pulse 400 milliseconds. Ives through-wire hinges are fully compatible with 4 wire and 8 wire installations. Available CON option comes with the Allegion Connect 8-pin Connector which makes it easy to connect to other electrical consumption devices. A monitor (MON) switch is available as an engineered special. Consult factory for availability.

Electrical through-wire panel with Allegion Connect (TWP) (700CS models only)

The through-wire panel solution works in the CS mortise hinge to maintain the clean aesthetic design of aluminum geared continuous hinges. Made with the same medical grade bearings of Ives other pin and barrel hinges, the CS Series brings through-wire panel innovation to your continuous hinge application while keeping its great looks.

The CS Series through-wire panel is a heavy duty, easy-to-install, stainless steel panel. Tested to 2.5 million cycles, the CS Series panel can quickly slip in and out of the hinge for maintenance and replacement.

Unlike all of the other manufacturer solutions the CS Series through-wire panel maintains a one piece appearance on the cover side of the hinge. It installs with the same $\frac{5}{16}$ " clearance as aluminum geared hinges and works in all of the decorative cover finishes.

Provides electric power transfer from the frame to the door in order to supply power to an electrified mortise or cylindrical locks, exit devices with electric latch retraction, and/or electric strikes (pairs of doors). Through-wire panel is rated 50 volts AC/DC at 3.5 amp continuous and 16 amp pulse. Maximum pulse 400 milliseconds. Ives through-wire hinges are fully compatible with 4 wire and 8 wire installations. Available CON option comes with the Allegion Connect 8-pin Connector which makes it easy to connect to other electrical consumption devices.

*Only available for full mortise hinges.

Electrical cutouts

Ives pin and barrel continuous hinges are available with factory modified cutouts to accommodate most electrical frame to door requirements. Special templates are required.

EPT 700/700CS

TW8 700s

Note: See ordering guide in price book for proper placement.

When ordering indicate the following:

1. Door size.
2. Handing. LH, RH, LHR or RHR.
3. Manufacturer and model number of the electrical product being used. Example; Von Duprin ETPT2

Because clearances may vary between door and frame manufacturer, and locations can be influenced by the door hardware it is always recommend contacting Ives Customer Technical for specific template information.

For your general information following are standard locations for Von Duprin EPT2 or EPT10, and TW (through-wire).

In accordance with industry standards, all cutouts are made from top edge of door to center line of cut-out.

Standard length	EPT	TW	TWP
83"	30"	43 $\frac{19}{32}$ "	43 $\frac{13}{16}$ "
85"	32"	45 $\frac{17}{32}$ "	44 $\frac{29}{32}$ "

Pivots

Floor pivots reduce stress on the frame by distributing the door weight to the floor. Intermediate pivots keep the door in alignment with the top and bottom pivots, and some are also load bearing. By taking advantage of the structure strength, this makes a pivot the ideal solution for heavy doors. Center and pocket pivots also provide an aesthetic option for an opening. Ives offers a complete line of $\frac{3}{4}$ " offset, $1\frac{1}{2}$ " offset, center hung, intermediate, pocket and power transfer pivots with all exposed parts made of brass or stainless steel for maximum corrosion resistance. The offerings include high strength brass and stainless-steel forgings, as well as castings for fire-rated and non-rated doors, combined with precision bearings for smooth operation. The positive locking vertical adjustment mechanism allows the installer to precisely position the door and balance the load.

Pivots

General information

UL Listed

- Ives non-rated brass Pivots are tested and approved UL 10C (20 min) as noted on model
- Ives rated stainless steel Pivots are tested and approved UL 10C (3 hrs) as noted on model

Material

High strength brass and 304 series stainless steel forgings, and castings for rated and non-rated doors combined with radial and needle precision bearings for smooth operation. See specific models for more information.

Pivot duty

Last digit in pivot set number reflects the maximum door weight in hundreds of pound, e.g., 7215 = 500 pounds. For sets designated as "heavy duty", add 1,000 pounds, e.g., 7237F HD set = 1700 pounds.

See table on the following page for selecting the proper pivot for the application.

Add additional Intermediate Pivots for each 100 pounds of door weight and/or for doors exceeding 7' in height. Intermediate pivots should be placed every 2'6" as needed.

Mounting hardware

Includes stainless steel machine screws and wood screws standard for all metal door and frames. Positive locking vertical adjustment mechanism allows the installer to precisely position the door and balance the load.

Electrification options

Electrified pivots are non-load bearing. Provides electric power transfer from the frame to the door in order to supply power to an electrified mortise or cylindrical locks, exit devices with electric latch retraction, and/or electric strikes (pairs of doors). Each wire is 28 AWG and rated 50 volts AC/DC at 3.5 amp continuous and 16 amp pulse. Maximum pulse 400 milliseconds.

1. Available on F fire-rated pivots and pocket pivots only.

2. Available on pocket pivots only.

For other colors, consult product support.

The Ives Power Transfer Intermediate (PT INT) pivots and Electrified Pocket Pivot (E) are available in 4 wire (TW4) or 8 wire (TW8). Supplied standard with Allegion Connect 4 or 8-pin Connector (CON) which makes it easy to connect to other electrified hardware items.

$\frac{3}{4}$ " (19mm)	$\frac{5}{8}$ " (16mm)

Hinges and pivots

Pocket pivots

91105F

Pocket pivot/hinge, fire rated

- Maximum door load of 90 pounds per pivot
- Use three pivots for doors 7'0" tall and one every 2'6" for taller doors as needed
- Full mortise
- Recommended for use with 1³/₄" door thickness only
- Not recommended for doors larger than 4'0" X 8'0"
- Not recommended for wood frames (must be used with steel frames for fire rating)
- Allows door to open a full 90°
- Non-handed

Specifications

Hinges and pivots

Pocket pivots

E91105F

Pocket pivot/hinge, power transfer, fire rated

- Non-load bearing
- Available in 28 gauge TW4 or TW8 (for additional electrical wiring applications, consult product support)
- Rated 50 VDC or VAC @ 3.5 amps continuous or 16 amp pulse, maximum pulse 400 milliseconds
- Full mortise
- Recommended for use with 1³/₄" door thickness only
- Not recommended for doors larger than 4'0" X 8'0"
- Not recommended for wood frames
- Allows door to open a full 90°
- Non-handed
- Standard for Allegion Connect

Pulls, push bars and plates

When a door does not require latching hardware, door pulls, push bars, push and pull plates are often used. Ives offers various pulls, push bars, and push plates and protection plates to meet opening needs, no matter the door's design, size, type or location. Choose from architectural pulls, decorative pulls, hands-free pulls, long door pulls, vandal resistant trim, and more.

General information

ANSI/BHMA Certified

All Ives architectural pulls, push bars, decorative pulls, and long door pulls meet ANSI/BHMA 156.06.

ADA Compliant pulls (EZ)

All Ives ADA compliant pulls (reference local authority having jurisdiction) come with the EZ designation. These pulls all have a door to pull clearance of 2 1/2" or greater. All stainless steel EZ pulls come standard with 316 Series Stainless which make them highly recommended for all external applications.

Material

All architectural pulls, push bars and decorative pulls are made of heavy duty, solid bar stock or castings. All long door pulls are made from tubular stock. Available material substrates are below. See pull model detailed pages for material availability.

Stainless steel	304 Series
Stainless steel	316 Series (Standard for all EZ pulls, EZ push/pull combo, and long door pulls. Available on 9100 series push bars as well.)
Brass	-
Aluminum	6061-T6 Alloy

Care and maintenance for stainless steel finishes

Stainless steel requires periodic cleaning just as other materials do when in service. Stainless architectural building components, for instance, are subject to road salt spray at ground level and deposits from polluted urban air at higher levels. Finger marks, deposits from tobacco smoke, stains from hard water or food left on to dry all detract from the original attractive appearance of stainless steel applications.

Cleaning methods and the frequency with which there are employed vary considerably according to application. One of the outstanding features

of stainless steel is the ease with which its fine appearance can be maintained. In many instances, only periodic warm water wash is sufficient to restore the original shine. In other cases, cleansing with a strong sterilizing solution may be required more frequently. Between these extremes are a broad range of cleaning requirements and methods. In all cases, there are some important “do’s and don’ts” that should be followed.

Do

- Wash regularly with warm water and mild soap detergent using a clean cloth or soft brush
- Remove stubborn grime using recommended cleaners and methods
- Always clean in the direction of the original polish lines
- Always rinse after cleaning and wipe dry

Don't

- Don't use ordinary steel wool or other metal scrapers to remove stubborn dirt
- Don't allow dirt to accumulate
- Don't allow protective coatings to remain on new building components; Remove all traces of adhesive as well as plaster, terrazzo, paint and other construction “splashes”
- Don't use harsh, untested cleaners

Heavy duty

All Ives architectural pulls, push bars and long door pulls come standard with heavy duty (HD) machining and mounting hardware to withstand high traffic and abuse applications which exceed industry standards. Many decorative pulls also come standard with heavy duty machining and hardware. Please see the list of pulls that come standard with heavy duty mounting hardware.

Pulls, push bars and plates

Architectural, decorative, long door pulls, push bars and plates

Pulls sizes - center to center

Pull sizes are determined by the center to center distance between the mounting locations. Ex. A 12" pull has 12" between the mounting locations. The overall pull length will be longer. See pull model detailed pages for specific size information. The table below shows standard available sizes for pulls.

5	5 1/4" (8111 and 8112 pulls only), 5 3/4" (8121)
6	6" (8102HD and 8105 only)
8	8" (8102HD, 8103HD, 8103EZHD, 8105, 8122HD, 8145EZHD, 8190HD, 8190EZHD, 8322HD only)
9	9" (8700 and 8800 only)
0	10" (8102HD, 8103HD, 8103EZHD, 8105, 8122HD, 8145EZHD, 8169, 8190HD, 8190EZHD, 8322HD only)
2	12" (8103HD, 8103EZHD, 8145EZHD, 8169, 8181, 8190HD, 8190EZHD, 8281, 8312, 8371, 8372, 8373, 8700, 8800, 8848, 8975 only)
16	16" (8181 and 8281 only)
18	18" (8103EZHD, 8145EZHD, 8181, 8190HD, 8190EZHD, 8281, 8371, 8372, 8373, 8700, 8800 only)
19	19 3/16" (8189 only)
20	20" (8320 only)
24	24" (8371, 8372, 8373, 8700, 8800 only)

Custom lengths are available as engineering special, consult customer service.

-	Aged Bronze	Stainless steel	643e/716
-	Matte Black	Stainless steel	BLK

1. AM - Antimicrobial finish. The antimicrobial coating is specifically formulated to inhibit the growth of bacteria by interrupting cell multiplication. The result is that the silver ions surround bacterial cells, blocking food and slowing the growth of bacteria, mold and mildew. Product with antimicrobial finishes will maintain the products standard warranty for finishes. High traffic, public use areas are ideally suited to antimicrobial coated door hardware. With hundreds or thousands of people accessing these areas every day, safety should be top of mind. Adding door hardware with an antimicrobial coating can make a difference by inhibiting the growth of bacteria on these high-tough surfaces. Applications where antimicrobial coated hardware makes sense include: healthcare, education, government, food service and childcare restrooms.
2. Recommend using 630-AM Antimicrobial for highly corrosive environmental applications

Custom finishes are available as engineering special, consult customer service.

Door thickness

- All Ives architectural pulls, push bars, decorative pulls, and long door pulls come standard with mounting hardware for door thickness ranging from 1 1/2" to 1 3/4". Many pulls have optional mounting hardware for 2" and 2 1/4" thick doors or are available as separate part accessories. See detailed pull model pages for availability.
- Mounting hardware for other door thicknesses are available as engineering special, consult customer service.

Pulls, push bars and plates

Architectural, decorative, long door pulls, push bars and plates

Mounting hardware

Mounting sizes

- All mounting hardware is for standard 1-3/4" doors with the exception of the glass door Q mount. Standard glass door thickness is 1/2".
- Optional mounting hardware for 2" and 2 1/4" doors for many pulls. See pull detail for availability.
- Other mounting hardware sizes available as engineering special. Consult Customer Service.

Through bolt mounts

STD mount - Standard mount

- Through bolt mount with countersunk washers
- Hollow metal and wood door applications
- (2) 3/8-16 x 2 1/4" brass, flathead mounting screws, plated to match
- (2) 3/8-16 Countersunk washers, plated to match

F mount - Countersunk holes

- Used with countersunk holes in doors
- Wood door applications
- (2) 2 1/4" steel flathead mounting screws, plated to match

O mount - Decorative

- Decorative through bolt mount
- Hollow metal and wood door applications
- (2) 3/8-16 x 2 1/4" Decorative mounting bolts - machine screw, plated to match

Q mount - Decorative, glass doors

- Decorative through bolt mount
- Glass door applications
- (2) Decorative mounting bolts - machine screw, plated to match
- (2) Metal and vinyl washers

X mount - Security

- Security through bolt mount with countersunk washers
- Hollow metal and wood door applications
- (2) Flathead security pin in socket mounting screws, plated to match
- (2) Countersunk washers, plated to match

Pulls, push bars and plates

Architectural, decorative, long door pulls, push bars and plates

Mounting hardware

Mounting sizes

- All mounting hardware is for standard 1³/₄" door.
- Optional mounting hardware for 2" and 2¹/₄" doors for many pulls. See pull detail for availability.
- Other mounting hardware sizes available as engineering special. Consult Customer Service.

Concealed mounts

A mount - Aluminum doors

- Concealed mount
- Aluminum door applications
- (2) Mounting bolts - machine screw
- (2) Set screws
- Designed to be used with rivet nuts (not supplied)

G mount - Pull plate

- Concealed mount with pull plate
- Hollow metal and wood door applications
- Pull mounts directly onto plate; plate is attached to door
- (2) 3/8" - 16 x 5/8" steel flathead mounting screws

I mount - Wood doors

- Concealed mount
- Wood door applications
- (2) Mounting bolts - wood screw
- (2) Set screws

L mount - Hollow metal doors

- Concealed mount
- Hollow metal door applications
- (2) Mounting bolts - machine screw
- (2) Set screws

Pulls, push bars and plates

Architectural, decorative, long door pulls, push bars and plates

Mounting hardware

Mounting sizes

- All mounting hardware is for standard 1-3/4" doors with the exception of the glass door P mount. Standard glass door thickness is 1/2".
- Optional mounting hardware for 2" and 2 1/4" doors for many pulls (see pull detail for availability).
- Other mounting hardware sizes available as engineering special (consult Customer Service).

Back to back pull mounts

Specify the below back to back mounting options to receive a pair of the model specified (2).

J mount - 8102 Pull only

- Back to back mounting - 5/16-18 hardware
- Hollow metal and wood door applications
- (2) Mounting bolts - machine screw
- (2) Set screws

K mount - 8121 Pull only

- Back to back mounting - 8-32 hardware
- Hollow metal and wood door applications
- (8) Machine screws
- (4) Mounting sleeves

N mount

- Back to back mounting - 3/8-16 hardware
- Hollow metal and wood door applications
- (2) Mounting bolts - machine screw
- (2) Set screws

P mount - Glass doors

- Back to back mounting - 3/8-16 hardware
- Glass door applications
- (2) Mounting bolts - machine screw
- (2) Set screws
- (2) Metal and vinyl washers

Pulls, push bars and plates

Architectural, decorative, long door pulls, push bars and plates

Mounting hardware

Mounting sizes

- All mounting hardware is for standard 1-3/4" doors with the exception of the glass door PQ mount. Standard glass door thickness is 1/2".
- Optional mounting hardware for 2" and 2 1/4" doors for many pulls (see pull detail for availability).
- Other mounting hardware sizes available as engineering special (consult Customer Service).

Push/pull combo mounts

NO Mount - Decorative

- Back to back mounting - 3/8-16 hardware (N) and Decorative through bolt (O)
 - Hollow metal and wood door applications
- Pushbar to pull
 - (1) Mounting bolt - machine screw
 - (1) Set screw
- Free end pushbar and pull
 - (2) Decorative mounting bolts - machine screw, plated to match

NS Mount - Standard

- Back to back mounting - 3/8-16 hardware (N) and Standard through bolt (S or STD)
 - Hollow metal and wood door applications
- Pushbar to Pull (N-Mount)
 - (1) Mounting bolt - machine screw
 - (1) Set screw
- Free end pushbar and Pull (STD-Mount)
 - (2) Flathead mounting screws, plated to match
 - (2) Countersunk washers, plated to match

PQ Mount - Decorative, glass doors

- Back to back mounting - 3/8-16 hardware (P) and Decorative through bolt (Q)
 - Glass door applications
- Pushbar to pull
 - (1) Mounting bolt - machine screw
 - (1) Set screw
 - (1) Metal and vinyl washers
- Free end pushbar and pull
 - (2) Decorative mounting bolts - machine screw, plated to match
 - (2) Metal and vinyl washers

Additional information

- If not specified, standard center to center length for pulls 36" or longer is 16" less than total pull length (8" from each end of the pull); Center to center length must be specified for lengths less than 36"
 - Ex. 72" Long pull has a 56" center to center
- If the center to center length is less than half the total pull length, consult customer service
- Specify PR when ordering a set of push bars for back to back mounting
- For one back to back machined push bar, specify NSGL or PSGGL (glass doors)
- Additional mounting post required for lengths greater than 96"; Mid posts are optional for other lengths (specify mid post location when ordering)

Caution

Recommend the length of the ladder pull should not exceed 4" less than the door height.

9266 Straight long door pull

9264 Offset bracket

Round tip (standard)

Flat tip (F option)

Note: A middle position bracket is required for pulls over 8 feet.

Pulls, push bars and plates

Hands-free door pulls

8122HD/8322HD

Hands-free reversible arm pull (models with and without plate)

Ives hands-free door pulls allow for hands-free operation to promote a healthy environment. Ives offers pulls in a variety of styles and designs that enable pedestrians to operate the door with an arm, elbow or wrist to avoid contacting surfaces with their hands.

- Durable construction with rust-free brass for longevity
- Cost effective option is budget friendly
- Easily retrofits to existing openings
- Aesthetically pleasing designs to suite with building style
- 1" Round pull with 2" round mounting posts
- Patented, rounded design enables safe and comfortable hands-free use
- Flexibility to open with forearm or wrist at top of bottom of pull
- Reversible design allows for flexible install toward hinge or latch side
- 8322HD available with 4 x 16" or 6 x 16" pull plate
- Available in 8" or 10" center to center

Types of protection plates

Mop plates

- Protect the bottom of the pull side of door subject to cleaning and mopping procedures.
- Size Ranges: 4" to 6" high, 22" to 48" wide

Kick plates

- Protect the bottom of the push side of doors subject to scuffing from foot traffic
- Recommended for all doors subject to normal use (especially doors using a closer)
- Size Ranges: 8" to 24" high, 22" to 48" wide

Stretcher plates

- Protect doors at specific areas where consistent contact is made by stretchers, service carts or other equipment
- Usually applied to push side of doors
- Size Ranges: 6" to 8" high, 22" to 48" wide

Armor plates

- Protect lower half of doors from abuse by hard carts, trucks and rough usage.
- Usually applied to push side of single doors and both sides of double acting doors
- Size Ranges: 26" to 48" high, 22" to 48" wide

Available accessories

- Gasket tape kit tape is recommended when using a brass plate on a metal door to reduce tarnishing from electrolytic oxidation
- One tape pack will cover an the perimeters of a 8" x 34" kickplate (Order 8401 gasket tape)

Edge guards and vandal resistant trim

Ives edge guards and vandal resistant trim are often used in schools, public building, or vandal prone area and can be used in both single and double door applications. They are designed to accommodate accompanying hardware and feature array of styles and options for your application. Choose edge guards for hinge or lock side to add durability to your doorways and vandal resistant trim in various styles all made of stainless steel with steel fasteners. The built-in lock protector prevents tampering with latch bolt on certain trim models. The protective cylinder collar spins to reduce damage from pipe wrench or other tools.

Edge guards

General information

Ives edge guards, designed to protect the edge of the door, can be used in both single or double acting door applications. They feature 21 types including beveled, non-beveled, bull nose, overlap and astragal. There are 10 standard cutout options, available in 0.050 material in stainless steel, brass or aluminum and can be used on 1 ¾", 2" or 2 ¼" thick doors. Available with stamped UL label for fire rated applications. Edge guard lengths have a range from 12" - 120" in ½" increments.

Use the Ives edge guard ordering guide to select the best edge guard model, UL, length, finish, and cutout option to fit your project needs.

Visit how to order guide: us.allegion.com/ivesedgeguardordering

Handing, door standards and options

Handing

Consider the hand of door and frame: left hand, right hand, left hand reverse, right hand reverse.

Active or inactive

If you are installing astragal type edge guards for double door applications, also consider if the door is:

- Active: the most often used door, featuring locking hardware
- Inactive: door that stays closed and is opened on occasion to create a larger entryway

Door and material thickness

Ives edge guards can be used on standard 1 ¾" doors and are also available for 2" and 2 ¼" doors. Use the guide below to evaluate door thickness. The edge guard material thickness is .050".

Edge mount standard

Edge guards are offered with standard mounting hole placement, as shown in the diagram.

Measure bottom of edge guard to center line (CL) of cutout

A. Cutout option A
B. Cutout option B
C. Cutout option C

1. Provided center as standard. If offset pull or offset push is required call customer care.
2. Cutouts are measured 6" bottom to center line.

Pulls, push bars and plates

Vandal resistant trim

VR810-DT/VR814-DT

Vandal resistant dummy trim (models with and without black grip)

- VR810-DT with black grip, VR814 without black grip
- Closed pull design eliminates a hooking point to be able to forcibly pull a secured door open
- Ligature resistant design
- For use with Falcon XX, 18 or 25 Series exit device
- Non-handed
- Pull operation only

Specifications

Available sizes	11 Gauge (0.120" thick)
Material substrate	304 Series stainless steel standard, exceeding industry standards for corrosion resistance. Recommended for external applications.
Mounting hardware	<ul style="list-style-type: none"> ▪ For door thickness 1³/₄-2¹/₄" - 10-24 X 1" and 10-24 X 1¹/₂" mounting screw size ▪ Can be mounted directly to Falcon XX, 18 and 25 exit devices ▪ Standard mounting - Welded studs fasten with pan head screws on opposite side of door ▪ Optional through bolt mounting - bolt through face of trim into device for added security

Models are available with or without attractive black plastisol edge grip.

Custom finishes are available as engineering special, consult customer service.

VR810

VR814

VR810-NL / VR814-NL

Vandal resistant night latch trim, LHR and RHR options (models with and without black grip)

- VR810-NL (LHR or RHR) with black grip, VR814-NL (LHR or RHR) without black grip
- Closed pull design eliminates a hooking point to be able to forcibly pull a secured door open
- Ligation resistant design
- For use with Falcon XX-V
- Through bolts direct to the exit device
- Night latch operation (cylinder not furnished)
- 1 5/8" cylinder hole cut-out on door, located 1 13/16" above horizontal center line and centered between mounting studs on vertical center line
- Designed for use with 1 1/4" cylinders
 - Other cylinders may require additional blocking rings, not supplied
- Supplied with protective cylinder collar
 - Collar spins to reduce damage from pipe wrench or other tool

Pulls, push bars and plates

Vandal resistant trim

VR900/VR904

Vandal resistant mortise trim, LHR and RHR options (models with and without black grip)

- VR900 (LHR or RHR) with black grip, VR904 (LHR or RHR) without black grip
- Closed pull design eliminates a hooking point to be able to forcibly pull a secured door open
- Ligature resistant design
- For use with most mortise locks on out-swinging doors including Schlage L9000 Series with interior L or N escutcheon, and rose trim
- Built-in lock protector prevents tampering
- Handed design allows trim to be positioned to coordinate with the centerline of inside hardware
- 1 1/2" cylinder hole cut-out on door, located 2 7/32" above horizontal center line and 1/4" offset from vertical center line towards the hinge side of the door
- Designed for use with 1 1/4" cylinders
 - Other cylinders may require additional blocking rings, not supplied
- Supplied with protective cylinder collar
 - Collar spins to reduce damage from pipe wrench or other tool
- Additional cut-outs and locations are available as engineering special, consult customer service

Flush pulls and sliding door pulls

Flush pulls are designed to complement sliding and pocket door applications. Flush pulls help maximize the space-saving benefits derived from installing sliding and pocket doors. Ives flush pull line has high quality pulls with upscale appearances that improve the look and feel of an interior sliding door or pocket door design. Whether standard or decorative flush pulls are needed, Ives offers various finishes, shapes, and sizes for any application.

Flush bolts, strikes and coordinators

Ives flush bolts, dust proof strikes, and coordinators are used on pairs of doors to secure the inactive leaf, projecting into the frame head and into a floor strike. In this application, the active leaf would typically have a lockset which latches into a strike mounted on the edge of the inactive leaf. Choose from a variety of flush bolt and coordinator types that accommodate the opening needs.

Automatic flush bolts

FB31P/FB31T/FB31B

Top and bottom flush bolts - metal doors

- FB31P top and bottom bolts pair
- FB31T top bolt only
- FB31B bottom bolt only
- Only for use with metal doors
- Fully automatic—inactive door is latched, bolts are extended when active door closes, door is unlatched, bolts retract when active door is opened
- Low actuation forces—top bolt has no spring tension
- Non-handed
- Bolt throw is $\frac{3}{4}$ " with a $\frac{7}{8}$ " vertical adjustment
- Bolt backset is $\frac{3}{4}$ "
- Standard rod length is 12", which is measured from the center of the flush bolt body to the bolt tip

Specifications

Mounting hardware	▪ 8-32 X $\frac{3}{8}$ " UFPHMS
	▪ 10-12 X $1\frac{1}{4}$ " Plastic anchor
	▪ 6-32 X $\frac{3}{8}$ " FPHMS
	▪ 6 X $\frac{3}{4}$ " FPHSMS
	▪ 8 X 1" FPHSMS
	▪ 10 X 1" FPHSMS

Certifications	▪ Fits standard ANSI/BHMA A115.4 door frame preparations.
	▪ UL10C Listed (3 hour) fire doors 8'0" x 10'0" when both top and bottom bolt used

Options

Optional rod lengths available for top bolt only on non-fire rated openings—18", 24", 36" and 48"

Dimensions

Body size (Width x Length x Depth)	Guide size (Width x Length x Height x Thickness)	Strike size (Width x Length x Thickness)	Rub plate size (Width x Length x Thickness)
1" x 6 $\frac{3}{4}$ " x 2"	1" x 1 $\frac{27}{32}$ " x $\frac{27}{32}$ " x $\frac{3}{32}$ "	$\frac{15}{16}$ " x 2 $\frac{1}{4}$ " x $\frac{1}{16}$ "	1 $\frac{1}{4}$ " x 1 $\frac{11}{16}$ " x $\frac{3}{64}$ "

FB358

Top or bottom bolts - wood doors

- When the active door is opened, the lever can be moved to the 'up' position, retracting the bolt and allowing the inactive leaf to be opened
 - When the inactive leaf is closed, the lever can be moved to the 'down' position, projecting the bolt into the strike and securely locking the inactive leaf
- Reduces installation costs; requires only simple router mortise at top and bottom corners of doors
- Door strength and rigidity maintained by tying door faces to reinforcing extensions on guide with machine screws and bearing washers, not supplied
- Non-handed
- Bolt tip 1/2" diameter
- Bolt throw is 3/4" with a 7/8" vertical adjustment
- Bolt backset is 3/4"
- Not available for rabbeted door installations

Specifications

Mounting hardware	<ul style="list-style-type: none"> 8 X 1" FPHSMS 8 X 3/4" FPHSMS

3 Filler bar (if desired)

FL20
FL32
FL44

4 Vertical rod exit device cutout (if applicable)

A, B, C, D, E, F, G

If other vertical rod exit device not listed on chart from page 167, then include information as shown on page 167.

5 Active door size

Required for all vertical rod exit device applications

To determine the size COR you need:

- Start with the active door width (X)
- Next consider the overall frame opening between stops (F)
- Preferably, the coordinator would equal the active door width (X) + approximately 1/2 inactive door width (Y). The coordinator must be 6" longer than the active door width (X) and less than the overall frame opening between stop (F).

Examples:

- Pair of 30" doors, 5/8" stops
Active door size, X = 30"
Overall frame opening between stops, F = 58-3/4"
Recommended coordinator: COR42
- Pair of 36" doors, 5/8" stops
Active door size, X = 36"
Overall frame opening between stops, F = 70-3/4"
Recommended coordinator: COR52
- 36" Active door, 18" Inactive door, 5/8" stops
Active door size, X = 36"
Overall frame opening between stops, F = 52-3/4"
Recommended coordinator: COR42
- 48" Active door, 24" Inactive door, 5/8" stops
Active door size, X = 48"
Overall frame opening between stops, F = 94-3/4"
Recommended coordinator: COR60

Flush bolts, strikes and coordinators

Coordinators, filler bars and mounting brackets

Special factory preparation for use with vertical rod exit devices

Coordinators may need to be prepared at the factory for use with some surface or concealed vertical rod exit devices (see chart).

Exit device manufacturer	Exit device number	Device backset	Maximum active door	Coordinator size needed	Coordinator cutout type	Mounting bracket needed
Von Duprin	5547-F	2 3/8"	33" 43" 51" 63"	42" 52" 60" 72"	Type A	None

If the exit device is not listed the following information is needed:

- Exit device manufacturer and model number
- Active door size, "X"
- Inactive door size, "Y"
- Exit device backset, "U"
- Stop width, "W"
- Stop thickness if other than 5/8", "V"

COR

Bar coordinators

- The COR Series coordinators are designed for use on pairs of doors when one door needs to close before the other
- All COR units function easily; the active door lever, located nearest to the active stop, holds the active door open until the trigger mechanism is released by the closing of the inactive leaf
- All COR units do not function correctly with swing-clear hinges (consult factory when used with 3/4" offset pivots)
- All COR units are equipped with an adjustable override feature which allows the active door to close under extreme pressure
- All COR units are compatible with flush bolts
- For openings where doors are unequal size
 - The coordinator length should equal the active door width plus approximately half the inactive door width
 - The coordinator must be 6" longer than the active door width and shorter than the overall frame opening between stops
- The COR Series does not cover the entire length of the stop, so a FL filler bar can be provided to maintain architecturally clean lines

Specifications

Material substrate	Aluminum 6000 Series
Certifications	<ul style="list-style-type: none"> ▪ Meets ANSI/BHMA A156.3 Type 21A ▪ UL Listed for installation on labeled frame

Sizes (available in five sizes for variable door opening widths)

Coordinator number	Length of channel	For opening widths	Common applications
COR32	32"	34" - 52"	Pair of 2'0" doors
COR42	42"	52" - 72"	Pair of 2'6" doors
COR52	52"	62" - 92"	Pair of 3'0" doors
COR60	60"	70" - 108"	Pair of 3'6" doors
COR72	72"	84" - 132"	Pair of 4'0" doors

Options

- Optional filler bars: FL20 - 20", FL32 - 32" and FL44 - 44", available to maintain clean line
- Security pin screws
- Special prep cut-outs: Required for certain vertical exit device applications (see page 169 for common examples)
 - If other vertical rod exit device not listed on chart is required, include required information as shown on page 169 (consult customer service for other applications)

Flush bolts, strikes and coordinators

Coordinators, filler bars and mounting brackets

COR7G/COR9G

Gravity coordinators

- When active door is open, coordinator prevents active door from closing until inactive door bypasses
 - Closing of inactive door causes strike plate on top of door to contact cam and lift arm, allowing active door to close
 - As inactive door continues closing, roller rides over strike plate on to door bracket, holding arm above active door
- Non-handed
- Gravity action arm and door bracket are adjustable on the job for ease of installation (rubber roller provides quiet and efficient operation, and helps protect the astragal and doors from damage)
- Nylon roller on short arm glides smoothly over door bracket and strike, ensuring silent operation.

Specifications

Available sizes	<ul style="list-style-type: none"> COR7G 7" projection - for use on pairs of doors with astragal on active door up to 4' or with astragal on inactive door up to 3'4" or with astragal on both doors up to 2'10" COR9G 9" projection - for use on pairs of doors with astragal on active over 4' or with astragal on inactive door over 3'4" or with astragal on both doors over 2'10"

Latches, catches and bolts

Ives has multiple roller latches and catches that assure a door will stay closed when not in use. These accessories will not keep a door secure and are not meant for security applications; they only help keep a door closed. Ives also offers a variety of surface bolts and door guards to provide an additional security level.

SB360

Surface bolt

- Surface bolt has 1 1/4" throw for maximum security
- Jimmy-resistant design, bolt locks automatically when thrown, can be released only by pressing knob toward door while retracting
- Ideal for all types of doors
- Available in 12" length
- Unit locks in both the up and down position
- Accepts padlock (not furnished) with maximum 3/8" diameter shackle, minimum 1 3/4" shackle opening height
- Units packed with one-way wood screws for added security
 - Standard wood screws also supplied
- Units packed with a universal top strike (US)

- Fully concealed mounting prevents vandalism
- Available in locking version. Unit locks in both the up and down position
 - Locking bolts are furnished with 2 keys in 4 keying variations
- Units packed with wood and machine screws to meet most field conditions
- M1 version has Actuator tab pointing away from the door
- M2 version has Actuator tab pointing towards the door

Specifications

Material substrate	Constructed of heavy duty steel
Certifications	Meets ANSI/BHMA A156.16 L84161 and UL10C Listed (3 hour) fire doors up to 8'0"

Dimensions

Bar	Top strike	Bottom strike
11" L x 3/4" W x 3/4" T, locking version 1 1/2" thick	1 1/4" W x 7/8" T x 15/16" D	3" L x 1" W x 1/8" T

Strike options

- T** Top strike only
- B** Bottom strike only
- TL** Top locking strike only
- BL** Bottom locking strike only

Available accessories

- Security pin screw
- Through bolts available
- End plug and end plug stud package
- Cylinder package
- Replacement strike packages

Latches, catches and bolts

Surface bolts

40

Surface bolt, decorative light duty

- Recommended for 1 3/8" and 1 3/4" hollow core doors or door partitions
- Concealed screw design enhances appearance and security
- Exceptional strength and durability provided by interlocking construction of heavy gauge track and rod
- Permanent stop prevents rod disengagement from track
- Tension spring holds bolt in desired position
- Track assures smooth operation and interlocks with side edges of rod to eliminate marring
- Decorative 5/8" diameter knob designed to facilitate bolt operation
- Available in 3", 4" and 6" lengths
- Units packed with wood screws
- Packed with both universal and mortise strikes

Universal strike

Mortise strike

Specifications

Material substrate	Made from extruded brass
Certifications	Meets ANSI/BHMA A156.16

253

Surface bolt, decorative heavy duty

- Recommended for 1 3/4" or larger doors
- Heavy duty, decorative bolt ideal where extra strength required
- Decorative 1 1/4" diameter knob fits well with any décor and designed to facilitate bolt operation
- Available in 8" and 12" lengths. Optional lengths available, consult factory.
- Units packed with wood screws
- Packed universal strike (US) and mortise strike (MS)

Universal strike

Mortise strike

Specifications

Latches, catches and bolts

Dutch door and mortise door bolts

054

Dutch door bolt

- Practical, rugged, attractive bolt for application on Dutch doors as well as other areas
- Chamfered rod end draws the two leaves of door tightly together
- Sufficient tolerance provided in strike opening to allow for misalignment of door leaves and also prevents binding of bolt
- Decorative 1" diameter knob designed to facilitate bolt operation
- Units packed with wood screws
- Packed with Standard Strike (SS), Mortise Strike (MS) and Universal Strike (US)

Specifications

Latches, catches and bolts

Door guards

481

Chain door guard

- Permits the door to be slightly opened to allow viewing
- Narrow chain holder maintains chain in stationary position when door guard is not in use, eliminating marring of door and frame caused by dangling chain
- Welded twist link steel chain finished to match door plate and chain holder
- Packed with sheet metal screws

Specifications

Material substrate	Made from wrought brass or burnished wrought steel
Certifications	Meets ANSI/BHMA A156.16

Latches, catches and bolts

Door guards

482

Solid bar door guard

- For use on doors that are flush with frames
- The solid bar, interlocking with the ball on the strike plate, permits the door to be slightly opened to allow viewing
- The hinged bar allows the door guard to be positioned 180° away from the door when not in use
- Edge protection plate, furnished with cast brass door guards only, minimizes the chance for marring the door or frame. Can be purchased as a separate item for Aluminum substrate
- Strike plate is designed to prevent the solid bar from marring the inside of the door when in use
- Packed with sheet metal screws

Latches, catches and bolts

Door guards

484

Privacy door guard

- For use on interior corridor openings such as hotels, apartments, or dormitories
- Modern design in variety of finishes to suite with your opening hardware style
- Enables the door to open partially while maintaining privacy for the interior resident
- Padded latch design for quiet operation from the open to close position
- ADA compliant design for ease of operation
- Ideal for fire-rated doors and does not allow the door to be held open, complying with NFPA80 requirements
- Easy to install and retrofit on existing openings
- Comes standard with 3 #12 x 1 -1/4 " Flat Head Sheet Metal Screws

Specifications

THIS PAGE INTENTIONALLY LEFT BLANK

Latches, catches and bolts

Roller latches

RL30/RL30A

Roller latch

- Recommended for higher traffic applications
- Actuation is simple, closing of the door causes the roller to fall in the depression of the strike, thereby holding the door closed
- The projection of the roller is easily adjusted using adjusting screws on the face of the unit
- Maximum projection of the roller is $\frac{3}{8}$ " allowing for variance in the door clearance
- Nylon roller standard
- Units packed with wood and machine screws to meet most field conditions
- RL30A model packed with ASA strike

Specifications

Material substrate	Made from forged brass

Latches, catches and bolts

Invisible latches

CL11

Invisible latch

- Invisible latch is ideal for installations where no visible latch or strike is desired
- Unit can be installed at the top, bottom or side of the door
- Can be mortised into the stop or surface mounted to the stop
- Recommended for use on small panels, cabinet doors or lightweight doors
- Not recommended for use on hollow lightweight doors with single point access to area
- Operation is simple, latching is accomplished by a slight push
- To unlatch the door, a harder push releases the door and pushes the door out
- Brass and plastic construction
- Applies 13 pounds to open the door
- Units packed with wood screws

Specifications

Material substrate	Made from brass and plastic
Certifications	Meets ANSI/BHMA A156.9, B03272

Dimensions

Body	Strike
1 1/4" W x 1 7/8" H x 7/16" T	9/16" W x 1 5/16" H x 9/16" Projection

335

Roller catch

- Recommended for higher frequency opening applications
- Smooth, positive latching action insured by powerful conical spring
- Durable nylon roller insures quiet operation
- Adjustable tension. Adjustments can be varied from 4 to 17 lbs. of holding power making possible a wide range of door performance
- Easily installed on thin doors
- Full lip style strike designed for simplified mortising
- Packed with sheet metal screws

Specifications

Material substrate	Made from wrought brass
Certifications	Meets ANSI/BHMA A156.16, L27081 for brass

Dimensions

Available accessories

- Security pin screws

CL21A

Ball catch

- Four-way catch with plate type strike
- Ideal for closet doors, access doors, hinged openings and numerous other applications
- The strike slides between two stainless steel balls that are under spring tension; As the strike engages, the door is held tightly shut
- Strike can enter body from any direction
- Spring tension is easily adjusted to suit field conditions
- Body can be surface applied or mortised
- Units packed with wood screws

Door stops, holders and silencers

With a full line of wall bumpers, wall holders, kick down holders and hinge pin stops for commercial and residential applications, Ives products are designed to ensure that doors will not slam into the wall. These accessories provide an economical alternative for doors without a closer and overhead stop or holder.

Door stops, holders and silencers

Floor stops and holders

FS13

Dome stop

- Standard FS13 for use where no threshold is used
- Heavy-duty cast dome stops constructed of brass
- Unique riser design of R14 (below) allows easy conversion to threshold application
- Units are packed with fasteners sufficient for mounting in all types of floor construction, including concrete
- Replaceable - grey rubber bumper

Specifications

Material substrate	Made from cast brass
Certifications	Meets ANSI/BHMA A156.16, L12141

Hinge pin door stop

- Economical solution for use on low frequency, 4 1/2" hinges or above hinged doors where the installation of a standard door stop or overhead is not desirable
- 85° to 125° Door opening adjustments
- Designed for narrow trim installation
- White rubber bumpers - shoulder on stud supports rubber through entire body for engineered cushioning
- Removable bushings accommodate 1/4" to 5/16" diameter hinge pins

Specifications

Material substrate	Made from cast zinc
--------------------	---------------------

Finishes

Available accessories

- Replaceable white rubber tip

Door stops, holders and silencers

Door silencers

SR64

Door silencer - metal

- For use on metal frames featuring pneumatic design that, once installed, forms an air pocket to absorb shock and reduce noise of door closing
- Tamper-proof once installed on the frame
- Proper installation also eliminates door rattle and provides constant tension for door latches or locks
- Packed in bags of 100
- Grey also available in bulk pack of 2500
- Each bag has an installation tool included

Specifications

Material substrate	Made from 60 Durometer styrene butadiene rubber
Certifications	Meets ANSI/BHMA 156.16, L03011

Dimensions

Diameter	Projection
1/2"	1/8"

SR65

Door silencer - wood

- For use on wood frames, also feature pneumatic design to cushion shock and absorb noise
- To prevent removal, a small brad should be driven into stop strip and through stem of silencer, as shown in the detail
- Packed in bags of 100

Specifications

Material substrate	Made from 60 Durometer styrene butadiene rubber
Certifications	Meets ANSI/BHMA 156.16, L03021

Dimensions

Diameter	Width	Projection
3/4"	3/8"	1/8"

SR66

Door silencer - adhesive

- Self adhesive rubber silencers
- Economical installation requires no drilling of frames
- Packed two sheets of 50 (100 minimum)

Specifications

Material substrate	Made from 60 Durometer styrene butadiene rubber
Certifications	Meets ANSI/BHMA 156.16, L03021

Dimensions

- Through bolt with cap nut mounting available in US26D (626) only

Exterior hardware

Lock guards, viewers, knockers and mail slots

Lock guards, viewers, knockers and mail slots

Ives provides exterior hardware designed to handle any weather and has a solution for any application needs. Ives offers a line of lock guards, all designed to fit specific door styles, lock types and trim types. Many designs of viewers, knockers, and mail slots are offered for front doors.

Exterior hardware

Lock guards

LG1/LG7

Lock guard (with and without security pin)

- LG1 incorporates security frame pin to prevent separation of the door and frame
LG7 does not incorporate the security frame pin
- Ideal for use with mortise or cylindrical locks
- Unit covers the latch bolt area of the door and lock, thereby providing added protection from burglars, vandals or normal abuse
- Non-handed
- Easy installation
- Through bolted with carriage bolts and nuts

Specifications

Material substrate	Made from 13 gauge stainless steel, 12 gauge steel (LG1 only) or brass (LG1 only)
Certifications	UL10C Listed (3 hour)

Introduction

Brackets, hooks and sockets

Ives offers hooks, handrail brackets, and sockets to handle a wide range of applications. These accessories provide the finishing touch in any job. Available in brass, aluminum, and zinc substrates and in multiple finishes. Choose from various hook styles that complete any office, resident or personal interior door for hanging coats and hats. Ives has a great selection of handrail brackets to hold various handrails.

059

Hand rail bracket

- Large faceplate for secure attachment to wall
- Features solid construction for increased strength
- Packaged with fasteners for wood applications

Specifications

Material substrate	Made from solid brass, cast aluminum, or zinc
Certifications	Meets ANSI/BHMA 156.16, L13061 for brass and L33061 for aluminum

-	Satin Nickel	Zinc	Z619E

*Not available on 581. For other colors, consult factory.

SP585

Closet pole sockets

- Flange design prevents accidental knock out of pole
- Accommodates pole or pipe with outside diameter of 1 3/8"
- Packed in pairs
- Packaged with fasteners for wood applications

Specifications

Material substrate Made from wrought steel

Finish

BHMA	Description	Substrate	Finish
632	Bright brass	Steel	F3

SP586

Closet pole sockets

- Single screw mounting
- Accommodates pole or pipe with outside diameter of 1 3/8"
- Packed in pairs
- Packaged with fasteners for wood applications

Specifications

Material substrate Made from a heavy duty plastic for long life and extra strength

Finish

BHMA	Description	Substrate	Finish
—*	White	Plastic	P

*Only available in Slim-Pak of 25.

Miscellaneous hardware

Decorative hooks

506

Plymouth coat and hat hook

- Decorative design is ideal for all installations
- Design complements Plymouth Series pulls and levers
- Surface mount
- Packaged with fasteners for wood/drywall applications

Specifications

Material substrate	Made from brass
Certifications	Meets ANSI/BHMA 156.16

Rescue hardware

Ives also offers rescue hardware designed to address a blocked doorway caused by an incapacitated patient, which is a problem often encountered by healthcare professionals. Used in conjunction with center hung pivots, rescue hardware allows a bi-directional door swing in emergency situations.

Miscellaneous hardware

Rescue hardware

Used in conjunction with center hung pivots, rescue hardware allows a bi-directional door swing in emergency situations. When a patient becomes trapped behind an inward swinging door, the center tong of the emergency stop depresses allowing the door to swing in the opposite direction without causing damage to the frame.

299AL / 299AB / 299AS, 299RB / 299RS

Emergency stops and rescue strikes

- 299AL Emergency stop; 299AB Emergency stop assembly - offset, 299AS Emergency stop assembly - center
- 299RB Rescue strike - offset, 299RS Rescue strike - center
- Center or offset mounting styles
- 7 model fits 5 3/4" frame and -8 model fits 6 3/4" frames
- Fits 1 3/4" door thickness (custom sizes available, consult factory)
- Must be used with center hung pivots such as Ives models: 7253, 7255, 7255J, 7256, and 7259
- Cannot be used with deadbolt applications
- Cannot be used with mortise locks that have deadlocking auxiliary latches
- Packed with 8-32 x 1/2" fasteners for hollow metal applications

How it works

Things to consider when ordering

Rescue hardware must consist of two components: a stop and a strike. The components can be ordered as two separate items (with one component mounted above the other on the frame), or as one assembly with integrated components.

Separate components

Rescue strike only

(available in -7 or -8 model)

Center 299RS

Offset 299RB

Emergency stop only

299AL (required to complete assembly)

Note: Refer to templates for dimensional details.

Integrated components

Emergency stop assemblies

(available in -7 or -8 model)

Center 299AS

Offset 299AB
